

Häny Mixing and Injection Technology

High Shear Mixer HCM 2500

The colloidal mixer is particularly suitable for the production of suspensions consisting of water, cement, ultra-fine binder, bentonite, and other materials. A robust mixing tank combined with highly wear-resistant materials in the mixing pump guarantee a long service life and trouble-free operation.

HÄNY

Mixing and Injection Technology

High Shear Mixer

HCM 2500

Key features

- ▶ Excellent mixing results thanks to the high turbulence generated by the high-speed mixing pump
- ▶ Mixing tank with conical bottom and pneumatic pinch valves for switching between mixing and transfer
- ▶ Automatic lubrication of the shaft seal
- ▶ Weighing cells for automatic batching of water and dry components
- ▶ Cleaning opening (manhole) for easy cleaning

Typical applications

- ▶ Preparation of suspensions consisting of water, cement, ultra-fine binder, bentonite, and other materials
- ▶ As a stand-alone system or in combination with agitator and injection pump

3D model

High shear mixer

Mixing pump:	TMP 60
Approx. capacity ¹ :	40 m ³ /h
Circulation capacity:	4,800 l/min
Usable content:	2,500 l
Liquid temperature:	Max. 40°C
Water feedthrough:	DN80/200
Dry component feedthrough:	3x DN200

¹: Water to cement ratio = 1

Electrical data

Voltage:	3x 400/460 V
Frequency:	50 / 60 Hz
Nominal power:	45 / 53 kW
Nominal current:	70.0 / 82.4 A
Speed:	1,475 / 1,770 min ⁻¹

Weight and dimensions

Approx. weight:	2,500 kg
Width:	2,220 mm
Height:	1,893 mm
Length:	2,585 mm
