Häny Mixing and Injection Technology

Compact Grout Plant IC 1400/726

The compact grout plants consist of the proven, standard Häny components of a mixer, agitator, and grout pump. This setup is suitable for a wide range of applications such as anchoring, sleeve pipe, contact, and backfill grouting. For higher outputs and increased quality control, the plants are also available in semi-automated and fully automated versions.

Compact Grout Plant

IC 1400/726

Key features

Pump performance

- Extremely compact mixing and injection system with central lifting point for easy transport and minimum installation time
- High productivity due to ergonomically positioned operating elements
- ► High reliability and low-maintenance operation with good accessibility to the wear parts
- Independent of pressure ratios, the suction stroke is always carried out at high velocity in order to flush the valves and to avoid clogging

Typical applications

- ► Grouting of anchors, soil nails, tension cables as well as for sleeve pipe, rock, and contact injections
- Preparation and pumping of bentonite suspensions for pipe jacking and microtunneling
