

Grout Pump

ZMP 625

Key features

Pump performance

- ► Extremely compact vertical injection pump for space-saving installation
- Infinitely variable limitation of injection pressure and delivery rate
- ► High reliability and low-maintenance operation with good accessibility to the wear parts
- ► Fast suction stroke to prevent clogging by flushing the valves
- ► Cooling water connection for continuous operation and high ambient temperatures

Typical applications

Grout pump

- Injection of anchors, soil nails, and tension cables, as well as for sleeve pipes, rock, and contact injec-
- Pre- and post-injections, pumping of bentonite suspensions for pipe and microtunnel driving and filling of pea gravel

Included as standard

- · Manual pressure and flow control
- · Oil level, temperature, and filter contamination indicator

Control

Lockable main switch, emergency stop Pump ON-OFF

Optional

- · Remote control
- · Data logging for pressure and flow rate

¹ Water to cement ratio = 1

² Filling ratio = 100%
