Häny Mixing and Injection Technology

Grout Pump ZMP 710

Extremely compact and low-wear plunger pump for pumping suspensions with a low W/C ratio and mortar with sand content. Suitable for all injection work and for pumping backfilling mortar for segment lining of tunnels.

Grout Pump ZMP 710

Key features

- Extremely compact vertical injection pump for space-saving installation
- Infinitely variable limitation of injection pressure and delivery rate
- High reliability and low-maintenance operation with good accessibility to the wear parts
- Fast suction stroke to prevent clogging by flushing the valves
- Cooling water connection for continuous operation and high ambient temperatures

Typical applications

- Injection of anchors, soil nails, and tension cables, as well as for sleeve pipes, rock, and contact injections
- Pre- and post-injections, pumping of bentonite suspensions for pipe and microtunnel driving and filling of pea gravel
